

Headquarters United States Strategic
Command Concept Plan 8888-11

Counter-Zombie Dominance
Operations

This plan was not actually designed as
a joke.

A zombie outbreak can affect
thousands of Individual Healthy
Humans in the span of minutes.
Ironically, given the consideration
that zombie outbreaks in human
hosts cannot possibly last longer than
40 days (because human hosts
require food and water to continue
functioning), there may be times
when Individual Healthy Humans will
be forced to abandon other Individual
Healthy Humans who are unable to
evade sources of zombie
contamination. Such situations could
arise while Individual Healthy
Humans are evacuating in the face of
incoming zombie forces. Individual
Healthy Humans must not be allowed
to "go back for" family, friends, or
other personnel who cannot get away
from zombies quickly enough.

All Individual Healthy Humans who
fall behind must be left behind.

Silent fires,
satellites extinguished
like crushed fireflies.
Winds stilled
like grounded jets
and stifled noises crawling
near our ears.
